INTERNATIONAL SOCIETY FOR HYBRID MICROELECTRONICS

The International Society for Hybrid Microelectronics is based in the U.S.A., and there are independent parallel organisations throughout the world. These groups are independent, non-profitmaking organisations, the purpose of which is to provide an informal means of discussing and advancing hybrid technology. This is achieved by the organisation of meetings, the publication of a Newsletter and other activities as appropriate. Membership is open to all and there are no formal entry requirements.

All these societies run a programme of meetings throughout the year on subjects concerned with thick films, and interested readers are advised to contact the following Chairmen for details of meetings in their own areas:

1. U.S.A.

Mr Robert L. Waer
I.S.H.M.
P.O. Box 3255
MONTGOMERY
Alabama 36109, U.S.A.

2. U.K.

Dr J. T. Law
Department of Medicine
University of Edinburgh
